IV AVIATION

IV AVIATION

Through many years of experience, we have established IV Aviation, an aviation consulting company dedicated to assisting clients and providing top-of-the line services.

Unlike many, Griff was born into the aviation world as the son of a 40-year veteran in aircraft sales. Griff started his legacy and began flying at the young age of 16 years old. Wanting to pursue his passion, he went onto one of the top aviation schools in the country and studied business aviation administration. He is now a multi-engine commercial pilot. From there, he has acquired extensive knowledge in the aviation industry from top to bottom. Griff is ready to give back to an industry that has given him so much.

Working with some of the top companies and manufacturers in the industry, he has been responsible for multimillion dollar transactions in about every facet of general aviation. Not many people are fortunate enough to be raised into such a unique industry with this expertise: this is why he is your first call for all things aviation.

IV Aviation is your one-stop shop for aviation consultation. As a first time buyer or adding another plane to your fleet, we will walk you through the market research to help you feel confident in purchasing a new airplane. Once we successfully acquire your new aircraft, we can manage it or guide you along the journey. Our wide range of services were designed to satisfy all of our customers- anytime, anywhere. We are committed to customer satisfaction as our top priority.
